The suppo-sition is gaining ground that France's refusal to furnish the record is due to a desire not to give publicity to revela-tions made in the letters from Waller, which were intercepted by the French of some of the French soldiers.

In letters which have been received here from Waller within the past few days he reveals the fact that in his letters to his wife, he informed her of various outrages committed upon these native women of Tamatave, and gives such a circumstancial account of the proceedings as to reflect on the French soldlery in Madagascar in a way which the French authorities might a ranch in the valley this side of Jacks son's Hole.
